About Me

I am a software developer that has over 6 years professional experience in the field. I have worked on everything from building websites for local businesses to building web applications that are used globally. Before I dedicated my life to code, I was working professionally in the arts, which gives me a creative edge to my work.

Experience

Full Stack Developer II at Prodigy

March 2021 - Present

Responsible for developing tutoring software with Postgresql, Prisma, Node.js, NestJS, GraphQL, React, and Next.js for a growing math game company. Worked within a close knit startup project to provide customer and tutor portals to manage and schedule tutoring sessions on a regular cadence. Worked as a mentor for co-op developers through pair programming, as well as led agile ceremonies such as demos and retrospectives.

Front End Web Developer II at Q4

August 2020 - March 2021

Responsible for developing the front end of elegant Investor relations websites using Javascript, Sass, Mustache.js, JQuery and HTML. Worked on JQuery widgets that calculate and display important stock information such as dividends, balance sheets, press releases and various other investor relations content. Worked as a mentor to other developers and led projects that improved workflows.

Software Developer at Grapevine6 (LiveSocial)

March 2019 - August 2020

Responsible for developing mobile first software with MongoDB, Node.js, Express, React, and Angular for a social media curation app called Grapevine6. Worked within a startup environment developing new features, as well as fixing bugs, to help users/ organizations manage and automate their social media posting process.

Front End Product Developer at Oxford University Press

April 2018 - March 2019

Responsible for developing software with MongoDB, Node.js, Express, KeystoneJs, and Handlebars.js for the Higher Education division of Oxford University Press. Worked within a small team to create a platform for interoperable textbook content usable within LMSs, such as user friendly content templates, dynamic simulations, and interactive educational diagrams.

Junior Solutions Developer at PHRI

May 2016 - April 2018

Responsible for developing software, with Visual Studio, for PHRI using industry standards in coding languages such as HTML, CSS, C#, SQL, Javascript while using frameworks such as ASP.NET, Bootstrap. Worked with a team to system test code using MS Test Manager before code is implemented as well as sanity test code after implementation.

Web Developer at Red Ten Fish

April 2015 - May 2016

Responsible for layout, coding and developing websites by using standard HTML/CSS practices. Diagnosed and resolved software or hardware incidents including Operating Systems and Software applications.

Education

Software Development at Mohawk College

September 2015 - January 2018

Bachelor of Photography at Sheridan College

September 2010 - April 2015
